PROFILE SUMMARY

- AI and Computer Vision Engineer with over **3+ years** of experience in designing and deploying advanced computer vision solutions.
- Expertise in leveraging **face recognition, neural networks, image processing, and real-time model optimization** to drive significant improvements in efficiency and accuracy.
- Demonstrated success across diverse domains, including **surveillance system, traffic monitoring system and accessibility technologies**, with a focus on delivering innovative solutions that enhance operational effectiveness.

WORK EXPERIENCE

Computer Vision Engineer

Futops Technologies Pune 📅 Oct 2022-current 📍 Pune Maharashtra, India

Projects

- Developed and deployed a traffic surveillance system. Detection accuracy for **no-helmet, triple riding, and red-light violations** increased by **81%**. Implemented a **best snapshot** technique for object detection across multiple frames, **raising accuracy from 40% to 75%** and received a **SPOT award** for this achievement.
- Created an AWS-based solution that increased the **independence of blind users by 80%**, utilizing real-time camera and headphone integration. The solution **achieved 82% accuracy** in detection and guidance for blind individuals.
- Enhanced a face recognition surveillance system with real-time detection, achieving **90% accuracy in face detection** and **95% accuracy in face recognition**. The system includes age, gender, mask detection, and feature extraction capabilities, with per-face processing times take to **30-35 milliseconds**.
- Implemented panoramic imaging for **360° CCTV cameras, increasing coverage by 100%** and generating **night-time panoramas** in low-light conditions using **OpenCV and GStreamer** and received a **SPOT award** for this achievement.

AI Research

AI4SEE.pvt.ltd 📅 Feb 2021-Sep 2022 📍 Bangalore Karnataka, India

Projects

- Rope Jump Counting App**: Developed a mobile application using Flutter that counts rope jumps, leveraging a TensorFlow Lite model for real-time motion detection and analysis.
- Farmer Product Sales App**: Developed a mobile app that enabled farmers to sell products directly to retail customers, increasing sales by 20%. Implemented a regression model to forecast product prices five days in advance, improving pricing accuracy and sales efficiency.

SKILLS

- programming languages :-** Python, C++ .
- Technologies :-** Linux, Docker, ZeroMQ, AWS rekognition, sagemaker, S3 , EC2, Pytorch, Tensorflow,Keras, Scikit-learn, YOLO, ONNX, OpenCV, OpenVino, CUDA, CNN, GAN, NLP, LLM .
- Specialties :-** Deep learning, Machine learning, Generative AI, Vision Transformer, Object Classification and detection, Image processing, Image segmentation .
- Soft skills :-** Teamwork and Collaboration, Adaptability, Analytical Thinking .
- Core competencies :-** Agile methodologies, Performance Optimization, Containerization .

LANGUAGES

English, Hindi, Marathi

EDUCATION

[Master of Computer Application](#)

Shivaji University Computer Science Department | Graduation Year: 2019

CERTIFICATIONS

[Data Science](#)

ExcelR Solution Bangalore. Jan 2019-May 2019
