PROFILE SUMMARY

- AI and Computer Vision Engineer with over **three years** of experience in designing and deploying advanced computer vision solutions.
- Expertise in leveraging **neural networks, image processing, and real-time model optimization** to drive significant improvements in efficiency and accuracy.
- Demonstrated success across diverse domains, including **surveillance, traffic monitoring, and accessibility technologies**, with a focus on delivering innovative solutions that enhance operational effectiveness.

WORK EXPERIENCE

Computer Vision Engineer

Futops Technologies Pune

📅 Oct 2022-current 📍 Pune Maharashtra, India

Projects

- Developed and deployed a traffic surveillance system. Detection accuracy for **no-helmet, triple riding, and red-light violations** increased by **81%**. Implemented a **best snapshot** technique for object detection across multiple frames, **raising accuracy from 40% to 75%** and received a **SPOT award** for this achievement.
- Created an AWS-based solution that increased the **independence of blind users by 80%**, utilizing real-time camera and headphone integration. The solution **achieved 82% accuracy** in detection and guidance for blind individuals.
- Enhanced a face recognition surveillance system with real-time detection, **achieving 84% accuracy** in face detection, including age, gender, mask, and feature extraction, while improving **processing times to 30-35 milliseconds**.
- Implemented panoramic imaging for **360° CCTV cameras, increasing coverage by 100%** and generating **night-time panoramas** in low-light conditions using **OpenCV and GStreamer** and received a **SPOT award** for this achievement.

AI Research

AI4SEE.pvt.ltd

📅 Feb 2021-Sep 2022 📍 Bangalore Karnataka, India

Projects

- Rope Jump Counting App**: Developed a mobile application using Flutter that counts rope jumps, leveraging a TensorFlow Lite model for real-time motion detection and analysis.
- Farmer Product Sales App**: Developed a mobile app that enabled farmers to sell products directly to retail customers, increasing sales by 20%. Implemented a regression model to forecast product prices five days in advance, improving pricing accuracy and sales efficiency.

SKILLS

Technical skills

- Python, C++
- Linux, Docker, ZeroMQ
- AWS rekognition, sagemaker, S3, EC2
- Pytorch, Tensorflow, Keras, Scikit-learn
- YOLO, ONNX, OpenCV, OpenVino
- Deep learning, Machine learning
- Generative AI, Vision Transformer
- Object Classification and detection
- Image processing, Image segmentation

Soft skills

- Teamwork and Collaboration
- Adaptability
- Analytical Thinking

Core competencies

- Agile methodologies
- Performance Optimization
- Containerization

EDUCATION

Master of Computer Application

[Shivaji University](#)

[Computer Science Department](#)

📅 2016-2019

📍 Kolhapur Maharashtra, India

Bachelor of Computer Science

[Shivaji University](#)

📅 2013-2016

📍 Vita Maharashtra, India

CERTIFICATIONS

Data Science

ExcelR Solution Bangalore.

📅 Jan 2019-May 2019
